

VEERAPPA NISTY ENGINEERING COLLEGE

Hasanapur, Tq:- Shorapur-585224 Dist:- Yadgir

E-mail: principal@veerappanistyecs.org

A Green Campus is a place where sustainable and eco-friendly practices are promoted. Greening the campus is done through sweeping away wasteful inefficiencies, using conventional sources of energies for its daily power needs, correct disposal handling, purchase of environment-friendly supplies and effective recycling program.

The campus is beautifully landscaped in a lush green stretch of land spread over 10.1 acres with a built-up area of 1 lakh square feet. Being situated near the lakeside with more than 50% of open land, the campus has a natural breeze around the year. Being situated away from the main road, it's also free from air and noise pollution.

The College has taken various initiatives and practices to make the campus green.

Green Initiatives

Roof-Top Solar water heater.

Sprinklers are used in gardens to prevent water wastage

Rain Water Harvesting system is in place

Reverse Osmosis (RO) water treatment plant is installed to get cleansed drinking water

Energy Efficient Lighting system is established through LED bulbs

Green Practices

- 2 college buses are available from different parts of the city for the students and faculty and this enables individuals commuting through their own vehicles to the college.
- Public Transport (KSRTC) Bus passes are also facilitated through the college. At times, faculty and students also do carpool. 'Bus Tracking System' is installed in all our buses to track the movement of the buses which in turn helps in monitoring and controlling the fuel usage
- Separate parking facility is available near the entrance and students vehicles are not allowed inside the campus
- All the vehicles mandatorily have Emission Test Certificate
- Smoking is strictly prohibited inside the campus.
- Plastic-free Campus
- Paperless communication (e-mail / WhatsApp communication) is a regular practice
- Usage of one-sided paper is encouraged

- Metal and other scraps are given to agents for further processing
- Separate Dustbins for recyclable and non-recyclable wastes are available in common places
- Used batteries and electronics wastes are disposed of through outside agencies
- Various awareness programs like tree plantation, energy conservation etc are regularly organized
- Environmental Science is also a mandated course for all the students.
